1.2 Painting

Pre-Treatment

- steel construction according to DIN 55928 as well as ISO-Standard 8501 SA 2.5 corundum blasted

Paint System

- primer coating with 2-K zinc-rich paint coat (89% zinc)
- second coating with EP/2-K-PUR etch primer
- third and fourth coating with 2K-PUR top coat
- cavities sealed with EP/PUR primer and 2K-PUR top coat
- paint system proofed with salt spray test DIN EN ISO 9227
- connecting components with zinc flake / zinc-nickel coating
- conservation with vapour stream resistant material

Painting

- single colored final painting in NCS 1175 Scania paprika red

1.3 General system information

- | | |
|--|--|
| • country specification | EU: sidelights, reflector strip (yellow) |
| • Components are prepared for brake system | ABS |
| • Power supply from tractor unit | 1 x 15 polig, 24 Volt |
| • vehicle voltage THP | 24 V |
| • Type of system | THP/ET |
| • tyre size | 285/70 R 19.5 |
| • Hydraulic oil are suitable | moderate climate zone |
| • Hydraulic oil for loading decks and accessories are suitable for | THP |

All supply-lines (Electric-cable, ABS-cable, brake-lines, hydraulic-hoses ...) between Truck tractor unit and trailer are, due to EU-regulations, part of the delivery-scope of the Truck tractor and are not part of the delivery scope of the trailer-producer.

Due to the increased wattage of the electricity consumers in our vehicles, for the signal transfer Goldhofer requires the 15-pole socket according to ISO 12089 (cable cross-section min. 2,5 mm²). The adapters from a 15-pole socket according to ISO 12089 to two 7-pole sockets according to ISO 1185 and ISO 3737 which are available on the market are required by the standards to have a maximum cross-section of 1,5 mm². In reality the manufacturers use a cross section of only 1 mm². These small cross-sections are not sufficiently safe for the operation of our electrical system. Any use of the 7-pole adapters therefore happens on the customer's own risk and Goldhofer assumes no liability for possible consequential damages.

1.4 r inin / Vehicle acceptance

1.4.1 Training/Induction

The price quoted includes a training session for your operating personnel at our factory in Memmingen. The training takes place together with the takeover of the vehicle.

ec ni documentation

- 1 x spare parts catalogue "easyPARTs" (online), German, English, Spanish, French and Portuguese (Brazilian) reversible
- 1 x operation and maintenance manual (Data carrier), **romanian**
